• Java • HTML • CSS • MongoDB • Power BI • Git / GitHub • Microsoft Azure
• Database Management • Data Analytics

## CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900)
- MongoDB Basics

## PROJECT

**SmartBuild Estimator:**
A web-based construction budget estimation and builder-connection platform that helps users plan construction costs efficiently and connect with relevant builders.

**Crime Record Management System:**
A Java-based application implementing full CRUD operations to manage and maintain crime records efficiently, enabling easy retrieval, update, and deletion of records.

**Company Reputation Analysis:**
A sentiment analysis project leveraging news and social media data to evaluate and track company reputation, providing actionable insights through data visualization.

**Sports Event Management System:**
An interactive Power BI dashboard solution for comprehensive sports analytics, enabling real-time tracking, event scheduling, and performance insights for sports management teams.

## EXPERIENCE

**Hyundai Motor India** – Assembly Shop Technician (2 Years). Executed vehicle assembly operations, maintained quality standards, collaborated in fast-paced teams, and contributed to process improvements.
